

finally,
brass samples
that swing, groove
funk, and
rock.

"...right away you can tell that these are the best sampled horns around..."

...one of the most impressive and ambitious libraries to come around in a few years...." —**Nick Batzdorf, Virtual Instruments**

Introducing **Broadway Big Band by Fable Sounds**, the virtual instrument that finally gets Pop, Rock, Jazz, Soul, Big Band and Broadway horns right. It's all here: growls, falls, chromatic runs, alternate sax fingerings, flutter tongue, trumpet shakes, mutes, multiple vibratos, grace notes, smears—all the articulations you just couldn't get in a virtual instrument before now. Equally impressive is the new **Muse**, a tremendous value in a comprehensive virtual instrument, featuring everything from rock guitars to orchestral strings; the highly-acclaimed **Sonic Implants Symphonic Collection**, (now available for Kontakt 2) a standard among composers and producers; and **LoopLine**, a multi-volume collection of loops, beats and textures like none you've ever heard. Check us out at www.SONiVOXmi.com or call toll-free **(888) 577-9629**.

SONiVOX
sound that rocks.
